

The St. San Plan

JULY, 2024 SUMMER

New Administration-Maintenance Facility.

The St. Vrain Sanitation District is ready to embark on an exciting new chapter in its history with the signing of a contract with local builder Mark Young Construction. The construction of an Administration-Maintenance facility in Frederick, Colorado is scheduled for completion by the Fall

of 2025. The new facility represents a significant investment in the District's infrastructure and operational capabilities. Designed to meet the community's evolving needs and enhance service, the facility will serve as a central hub for administrative functions, collection system maintenance, Boardroom, and employee training facilities.

As the project takes shape, the District looks forward to the countless opportunities ahead. With the support of its partners, stakeholders, and the community we serve, St. Vrain Sanitation District is ready to achieve new heights of success, ensuring a brighter, more sustainable future for generations.

Introducing Our New District Manager, Chris Kampmann!

It is with immense excitement and pride that we welcome Chris Kampmann as our new District Manager! After a thorough search, we are thrilled to announce that Chris will be joining our team to lead us forward in our mission of serving our community with excellence.

With over 20 years in the water industry, Chris brings with him a wealth of experience and a deep-rooted passion for the wastewater industry. With over two decades of dedicated service, including his noteworthy tenure at the City of Longmont and his current role as Utility Services Manager for the City of Arvada, Chris's expertise is second to none. His leadership in various capacities, including the Chair of the State's Underground Damage Prevention Commission, speaks volumes about his commitment to advancing our field.

Not only is Chris highly skilled, but he is also incredibly passionate about the work he does. His unwavering dedication to the industry and his community is truly inspiring, and we are fortunate to have him on board. We are confident that his visionary leadership and innovative approach will propel us toward even greater success.

Please join us in extending a warm welcome to Chris Kampmann! His enthusiasm and dedication are infectious, and we can't wait to embark on this exciting journey together under his guidance.

Email: ckampmann@stvrainsdco.gov

Here's to a bright future ahead with Chris at the helm!

Engage. Connect. Inspire.

St. Vrain Attends the Colorado Water Workforce Summit

In an era where water management and conservation have become supreme, the importance of fostering a skilled and passionate workforce cannot be overstated. Recognizing this need for collaboration and innovation, the Colorado Water Center organized the inaugural **Colorado Water Workforce Summit on April 2-3, 2024.**

St. Vrain Sanitation District, joined by counterparts from Boxelder Sanitation, seized the opportunity to engage with fellow professionals, connect with industry leaders, and draw inspiration from the wealth of knowledge and expertise on display. Pictured above left to right are: Nate Swartzbaugh - District Inspector, Johnathan Miller - GIS Coordinator, and Heidi Hurtado -HR, who represented the District at the summit, expressing our commitment to staying at the forefront of water management practices and fostering talent within its ranks.

As we shared ideas and built new relationships, the teamwork among organizations set the stage for groundbreaking projects that will influence the future of water management in Colorado and beyond.

As Colorado continues to confront complex water challenges in the years ahead, the collaborative spirit and forward-thinking mindset fostered at events like the Colorado Water Workforce Summit will be essential in driving positive change and securing a sustainable future.

Have you ever considered a career in Wastewater?

Don't want to sit at a desk all day?

Do you want to make an impact on the environment in a positive way?

Enjoy working outside and problem solving?

Wastewater is water that has previously been used and may contain oils, chemicals, food, or sewage. Wastewater **treatment facilities** collect wastewater in a central location for treatment prevent pollution in rivers, lakes and the environment.

Wastewater-treatment-plant operators control processes and equipment that remove pollutants in water to ensure wastewater can be returned safely to natural areas. St. Vrain Sanitation District is dedicated to assisting our operators with furthering their training and education every step of the way.

“Our mission is to protect public health by providing high-quality water reclamation through collection and treatment.”
